Chichester Festival Theatre

LOCATION

Oaklands Park, Chichester

VALUE

£1.9M

DATE

November 2015

April 2016

CASE STUDY

Minerva Theatre.

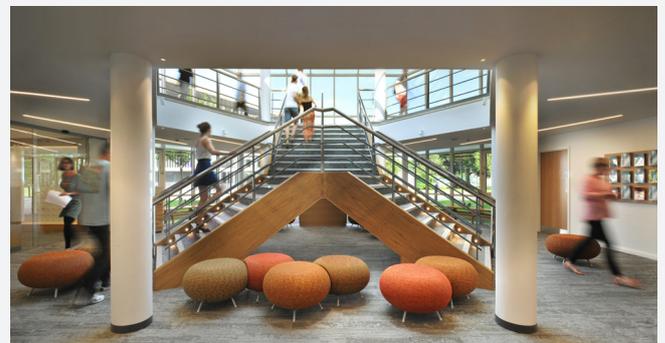

About the project.

This development involved a major refurbishment to one of the UK's flagship theatre complexes. Part of Chichester's Festival Theatre, the Minerva Studio Theatre has an international reputation for creating magical live performances, which brings together the community.

Works have been carried out to both restaurant and bar areas, the front of house lobby and atrium, box office and back of house areas including star dressing rooms, green room and associated facilities.

With performances scheduled for the new season, the new re-design and subsequent build programmes were short and extremely critical with everyone adopting 'the show must go on' mentality with regards to completing the project to a high standard.

Brymor's site team worked closely with the Theatre's team to manage the refurbishment alongside the existing main Festival Theatre, which remained in full operation during the works, keeping disruption to a minimum.

“In September 2015, Chichester Festival Theatre appointed Brymor Construction to refurbish the Minerva Theatre and restaurants between seasons. Brymor's care, attention to detail and diligence from the office to site provided us with a great confidence throughout the project. Their design and cost management gave us the opportunity to maximise the scope and quality whilst maintaining an achievable completion date. The site team were great to work with and understood our need for business continuity as a front facing organisation throughout the build.

Chichester Festival Theatre are immensely proud of the project and we attribute a great deal of its success to our partners, Brymor Construction and their team”.

Dan Watkins, Project Director, Chichester Festival Theatre
