Peter Cooper Motor Group

## LOCATION

Hedge End

## VALUE

£1M

## DATE

August 2015  
December 2015**CASE STUDY**

# Peter Cooper Garage.

## About the project.

This scheme comprised of three key areas:

- The car showroom
- The workshop
- Office accommodation

Due to the nature of the business, the project required careful programming and managing to ensure the highest quality was delivered within timescales and budget. This was especially in the case of the workshop areas, due to the high mechanical content and installation required.

The mechanical and electrical design co-ordination was of paramount importance as a Contractor Design Portion with precise setting out and very high quality product selection of key importance particularly in the showroom floor and ceiling, but also in the MOT and service bays.

Our team worked extremely closely with the Client, allowing their team to attend site early to install corporate signage and furniture, fixtures, and equipment. This, in turn, enabled them to re-open to the public at the earliest opportunity.
