CASE STUDY

# Cupid House.

## About the project.

Brymor were contracted to carry out investigation works to a building that was showing signs of defects in the construction and to carry out necessary re-medial works.

The works on site consisted of:

- Removal of ceilings in flats to identify defects
- Propping of existing structure and removal and replacement of water affected timber
- Water proof treatment to balconies including forming of new up-stands to comply with Building Regulations
- Removal and replacement of the parapet walls
- Repair of existing UPVC windows
- Replacement of compliant UPVC doors and frames
- Making good and redecoration
